Teaching Testimonials

"Joe has now taught my 16 year old son electric guitar for about 3 years. He has successfully taught him through grade 1 to grade 5 Rock School. Not only does Joe focus on grading but also gives insight into all aspects of playing guitar such as music theory and all skills to become a better guitarist. Joe's method of teaching has kept my son engaged, so much so that he has decided to study guitar performance at ACM. I would highly recommend Joe as he is very professional, friendly and patient. He has a great rapport with my son and continues to help him develop his guitar skills. Thank you Joe for all your great work, it's very much appreciated." - Nicky (Parent)

"Joe has been teaching Louis for just over five years now. His enthusiasm and patience at every lesson has encouraged Louis to believe in himself and to appreciate and understand the many genres of music Joe has introduced him to. Joe really has taken Louis to the next level within his enjoyment of music and continues to challenge him even to the point of encouraging him to sing which has benefitted him so much. Joe really has a great sense of humour and at the same time has a very professional manner. He manages to tailor make his lessons around his students and his extended knowledge of music theory has enabled Louis to study for music exams at GCSE's and A level standard. We are so fortunate to have met Joe and to have him as a guitar teacher for Louis, they have built up a great relationship and Louis just loves his lessons. I really would highly recommend Joe for beginners and advanced levels for acoustic and electric guitar lessons" – Rachel (Parent)
